Golden River Resources Corporation ("Golden River Resources") is incorporated in the State of Delaware. The principal shareholder of Golden River Resources is Northern Capital Resources Corporation ("NCRC") which owned 96.6% of Golden River Resources as of December 31, 2012.

Golden River Resources is a gold exploration company focusing its activities in Canada. On March 17, 2009, the Company announced that it had reached agreement with Acadian Mining Corporation (TSX: ADA) ("Acadian") to subscribe in a private placement transactions for common shares in Acadian and since that time, it acquired an interest by June 30, 2011 of 71.48%. In February 2012, it sold 19.9% of Acadian and since that time it has sold a further 29.80% interest and at December 31, 2012 it holds 22.20% of Acadian. Golden River Resources has given notice under the Canadian early warning regime that it intends to sell a further interest in Acadian, and if it proceeds with that sale, it will hold a 7.25% interest in Acadian (Note 8).

The financial statements presented herein have been prepared on a consolidated basis to include the accounts of Golden River Resources and its subsidiary (collectively "the Company"). All intercompany balances and transactions have been eliminated in consolidation. Certain prior year amounts have been reclassified to conform to current year presentation, including amounts related to discontinued operations.

Effective November 1, 2010, the Company had a 1-for-10 reverse stock split of its Common Stock and accordingly, all share and per share data has been retroactively restated.

In November 2010, Acadian consolidated its outstanding common shares on a basis of one post-consolidation share for every ten pre-consolidation shares as approved by the shareholders of Acadian. Acadian's common shares commenced trading on a consolidated basis on November 17, 2010. All comparative figures have been retroactively adjusted as if this share consolidation occurred on January 1, 2010.

The Company's consolidated financial statements are prepared using US GAAP applicable to a going concern, which contemplates the realization of assets and liquidation of liabilities in the normal course of business. However, Golden River Resources is an exploration stage company which has not yet commenced revenue producing operations and has sustained recurring losses since inception, all of which raises substantial doubt as to its ability to continue as a going concern.

In addition, Golden River Resources has historically relied on loans and advances from corporations affiliated with the President of Golden River Resources and fund raising through the sale of equity instruments. Based on discussions with these affiliate companies, the Company believes this source of funding will continue to be available.

Other than the arrangements noted above, the Company has not confirmed any other arrangement for ongoing funding. The Company's ability to continue operations through fiscal 2013 is dependent upon future funding from capital raisings, or its ability to commence revenue producing operations and positive cash flows.

(a) Disclosure Controls and Procedures

Our principal executive officer and our principal financial officer evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934 as amended) as of the end of the period covered by this report. Based on that evaluation, such principal executive officer and principal financial officer concluded that, the Company's disclosure controls and procedures were effective as of the end of the period covered by this report at the reasonable level of assurance.

(b) Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting during the second quarter of fiscal 2013 that materially affected, or are reasonably likely to materially affect, internal control over financial reporting.

(c) Other

We believe that a controls system, no matter how well designed and operated, cannot provide absolute assurance that the objectives of the controls system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected. Therefore, a control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Our disclosure controls and procedures are designed to provide such reasonable assurance of achieving our desired control objectives, and our principal executive officer and principal financial officer have concluded, as of December 31, 2012, that our disclosure controls and procedures were effective in achieving that level of reasonable assurance.
