## PART I – FINANCIAL INFORMATION

### Item 1. Financial Statements.

#### Introduction to Interim Consolidated Financial Statements.

The interim consolidated financial statements included herein have been prepared by Golden River Resources Corporation (“Golden River Resources” or the “Company”) without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (the “Commission”). Certain information and footnote disclosure normally included in consolidated financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations, although the Company believes that the disclosures are adequate to make the information presented not misleading. These interim consolidated financial statements should be read in conjunction with the financial statements and notes thereto included in the Company’s Annual Report on Form 10-K for the year ended June 30, 2009.

In the opinion of management, all adjustments, consisting of normal recurring adjustments and consolidating entries, necessary to present fairly the consolidated financial position of the Company and subsidiaries as of March 31, 2010, the results of its consolidated operations for the three and nine month periods ended March 31, 2010 and March 31, 2009 and for the cumulative period July 1, 2002 (inception of exploration activities) through March 31, 2010, and the changes in its consolidated cash flows for the nine month periods ended March 31, 2010 and March 31, 2009 and for the cumulative period July 1, 2002 (inception of exploration activities) through March 31, 2010, have been included. The results of consolidated operations for the interim periods are not necessarily indicative of the results for the full year.

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

#### Foreign Currency Translation

Prior to July 1, 2009, the Company’s functional and reporting currency was the Australian dollar and its subsidiary, Golden Bull Resources Corporation’s functional currency was the Canadian dollar. However, as a result of the purchase of the controlling interest in Acadian Mining Corporation in Canada in July 2009, the Company’s fiscal 2010 revenue and expenses will be primarily denominated in Canadian dollars (CDN\$). ASC Topic 830 “*Foreign Currency Matters*” states that the functional currency of an entity is the currency of the primary economic environment in which the entity operates. Accordingly the Company determined that from July 1, 2009 the functional and reporting currency of the Company is the Canadian dollar. Assets, liabilities and portions of equity were translated at the rate of exchange at July 1, 2009 and portions of equity were translated at historical exchange rates. Revenue and expenses were translated at actual rates. Translation gains and losses were included as part of accumulated other comprehensive loss.

Restatement of comparative numbers was made for the change in functional and reporting currency. The change was adopted prospectively beginning July 1, 2009 in accordance with ASC Topic 830.

UNLESS OTHERWISE INDICATED, ALL FINANCIAL INFORMATION PRESENTED IS IN CANADIAN DOLLARS.

Golden Bull Resources Corporation is undertaking exploration activities for gold in Canada. On March 8, 2006, shareholders approved the change of the Company's name to Golden River Resources.

Golden River Resources as part of its business strategy is increasing its gold and base metal exploration activity in Canada and is continually sourcing new ground in Canada which is one of the most prospective areas for new gold discoveries. On March 17, 2009, the Company announced that it had reached agreement with Acadian Mining Corporation (TSX: ADA) ("Acadian") to subscribe in a private placement transaction for up to 338,111,334 common shares ("Offering") in Acadian for aggregate gross investment of up to CDN\$10 million. The Offering was contemplated to close in two or more tranches giving Golden River a 68.76% holding of Acadian.

The closing of the first tranche, for an aggregate of CDN\$1.0 million (38,111,334 shares) was subject to receipt of the required regulatory approvals, including the approval of the Toronto Stock Exchange which occurred in early June 2009. Upon completion of closing of the initial tranche, the Company was entitled to nominate one member to the board of directors of Acadian and nominated Mr Menachem Vorchheimer. The Company held a 19.9% interest in Acadian at June 30, 2009.

The balance of the subscription by Golden River Resources into Acadian of CDN\$9 million (300,000,000 shares at CDN\$0.03 per share) was expected to be completed in one or more tranches upon the receipt of all necessary regulatory approvals, approval of the shareholders of Acadian and the satisfaction of certain other conditions precedent, including completion of due diligence by the Company. Acadian obtained approval from its shareholders at its annual meeting in June 2009.

Throughout July 2009, Golden River Resources subscribed for further shares to a value of CDN\$4 million and at July 31, 2009, the Company held a 52.764% interest in Acadian. As a result, Golden River Resources has since that time consolidated the results of Acadian. The financial statements presented herein have been prepared on a consolidated basis to include the accounts of Golden River Resources, Acadian and its other subsidiaries (collectively "the Company"). All intercompany balances and transactions have been eliminated in consolidation.

The Company's consolidated financial statements are prepared using generally accepted accounting principles applicable to a going concern, which contemplates the realization of assets and liquidation of liabilities in the normal course of business.

**(2) Summary of Significant Accounting Policies**

**(i) Functional and Reporting Currency**

Prior to July 1, 2009, the Company's functional and reporting currency was the Australian dollar and its subsidiary, Golden Bull Resources Corporation's functional currency was the Canadian dollar. However, as a result of the purchase of the controlling interest in Acadian Mining Corporation in Canada in July 2009, the Company's fiscal 2010 revenue and expenses will be primarily denominated in Canadian dollars (CDN\$). ASC Topic 830 "*Foreign Currency Matters*" states that the functional currency of an entity is the currency of the primary economic environment in which the entity operates. Accordingly the Company determined that from July 1, 2009 the functional and reporting currency of the Company is the Canadian dollar. Assets, liabilities and portions of equity were translated at the rate of exchange at July 1, 2009 and portions of equity were translated at historical exchange rates. Revenue and expenses were translated at actual rates. Translation gains and losses were included as part of accumulated other comprehensive loss.

Restatement of comparative numbers was made for the change in functional and reporting currency. The change was adopted prospectively beginning July 1, 2009 in accordance with ASC Topic 830.

(ii) Property, plant and equipment

Property, plant and equipment are recorded at cost. Depreciation is provided for on office assets using the declining balance method at the following annual rates (in the year of acquisition one-half of the calculated depreciation is recognized):

Vehicles	30%
Building	5%
Office fixtures and computer equipment	20%

Mine site assets are depreciated on a straight line balance method over the expected life of the mine at thirteen and one half years; assets under capital lease are depreciated on a straight line basis over the four year term of the lease.

All other assets are depreciated over a period covering their estimated useful lives.

(iii) Fair Value of Financial Instruments

The Company's financial instruments consist primarily of cash, receivables, accounts payable and accrued expenses, and advances from affiliates. The carrying amounts of cash receivables, accounts payable and accrued expenses approximate their respective fair values due to the short term maturities of these instruments. The fair value of advances from affiliates are not practicable to estimate as no similar market exists for these instruments and as it does not have a specified date of repayment.

(iv) Lease Liability

Leases meeting certain criteria are accounted for as a capital lease. Imputed interest is charged against income. The capitalised value of the assets is depreciated over the term of the lease. The Company has entered into leasing agreements of four year terms for mining equipment. Obligations under capital lease are reduced by the rental payments net of imputed interest. All other leases are treated as operating leases.

(v) Net Profit/Loss per Share

The Company follows the FASB ASC Topic 260 "Earnings per Share" provisions which require the reporting of both basic and diluted profit/(loss) per share. Basic profit/(loss) per share is computed by dividing net profit/(loss) available to common stockholders by the weighted average number of common shares outstanding for the period. Diluted net profit/(loss) per share reflect the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. Anti-dilutive effects on net profit/(loss) per share are excluded.

(vi) Impairment of Long-Lived Assets

The Company accounts for its long-lived assets in accordance with ASC Topic 360, "Impairment or Disposal of Long-Lived Assets". ASC Topic 360 requires that long-lived assets be reviewed for impairment whenever events or changes in circumstances indicate that the carrying value of its assets, including property, plant and equipment and mineral rights, by estimating the future net cash flows expected to result from the asset, including eventual disposition. If the future net cash flows are less than the carrying value of the asset, the impairment loss is recorded equal to the difference between the asset's carrying value and fair value or disposable value.

#### **(4) Recent Accounting Pronouncements**

In June 2009, the Financial Accounting Standards Board (“FASB”) issued the FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles, also known as FASB Accounting Standards Codification (“ASC”) 105-10, Generally Accepted Accounting Principles, (“ASC 105-10”). ASC 105-10 establishes the FASB Accounting Standards Codification (“Codification”) as the single source of authoritative US GAAP recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (“SEC”) under authority of federal securities laws are also sources of authoritative US GAAP for SEC registrants. The subsequent issuances of new standards will be in the form of Accounting Standards Updates (“ASU”) that will be included in the Codification. Generally, the Codification is not expected to change US GAAP. All other accounting literature excluded from the Codification will be considered non-authoritative. This ASC is effective for financial statements issued for interim and annual periods ending after September 15, 2009. The Company adopted this ASC for its quarter ended September 30, 2009. The adoption did not have any effect on our financial condition or results of operations. All accounting references have been updated, and therefore SFAS references have been replaced with ASC references.

In December 2007, the FASB issued amended ASC Topic 805, Business Combinations. ASC 805 establishes principles and requirements for how the acquirer of a business recognizes and measures in its financial statements the identifiable assets acquired and the liabilities assumed. The provisions of ASC 805 are effective for the Company’s fiscal year beginning July 1, 2009 which applies prospectively to all business combinations entered into on or after such date. Golden River’s acquisition of Acadian (see note 10) was and any other future acquisitions will be impacted by application of this statement.

In April 2008, the FASB issued amended ASC Topic 350, Intangibles - Goodwill and Other (“ASC 350”). ASC 350 amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under former SFAS No. 142, Goodwill and Other Intangible Assets. This new guidance applies prospectively to intangible assets that are acquired individually or with a group of other assets in business combinations and asset acquisitions. ASC 350 is effective for financial statements issued for fiscal years and interim periods beginning after December 15, 2008. The adoption of ASC 350 has had no impact on the Company’s financial position, results of operations, or cash flows.

The Company adopted the “Financial Instruments Topic”, ASC 825 on April 1, 2009. This standard requires disclosures about fair value of financial instruments in interim financial statements as well as in annual financial statements.

In April 2009, the FASB issued ASC Topic 320-10-65, "Recognition and Presentation of Other-Than-Temporary Impairments" ("ASC 320-10-65"). ASC 320-10-65 amends the other-than-temporary impairment guidance for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. ASC 320-10-65 does not amend existing recognition and measurement guidance related to other-than-temporary impairments of equity securities. ASC 320-10-65 is effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. ASC 320-10-65 does not require disclosures for earlier periods presented for comparative purposes at initial adoption. In periods after initial adoption, ASC 320-10-65 requires comparative disclosures only for periods ending after initial adoption. The adoption of ASC 320-10-65 has had no impact on the Company's financial position, results of operations or cash flows.

In May 2009, the Financial Accounting Standards Board (FASB) issued guidance on the accounting for and disclosure of events that occur after the balance sheet date. This guidance was effective for interim and annual financial periods ending after June 15, 2009. In February 2010, the FASB issued Accounting Standards Update (ASU) 2010-09, Subsequent Events: Amendments to Certain Recognition and Disclosure Requirements. This ASU retracts the requirement to disclose the date through which subsequent events have been evaluated and whether that date is the date the financial statements were issued or were available to be issued. ASU 2010-09 requires an entity that is a SEC filer to evaluate subsequent events through the date that the financial statements are issued. ASU 2010-09 is effective for interim and annual financial periods ending after February 24, 2010. The adoption of this guidance did not have an impact on our consolidated financial statements.

In August 2009, the FASB issued Accounting Standards Update No. ("ASU") 2009-05, "Measuring Liabilities at Fair Value." ASU 2009-05 supplements and amends the existing definition of fair value while reintroducing the concept of entry value (amount an entity would receive to enter into an identical liability) into the definition. Additionally, ASU 2009-05 clarifies that restrictions preventing the transfer of a liability should not be considered as a separate input or adjustment in the measurement of its fair value. ASU 2009-05 is effective for the first reporting period, including interim periods, beginning after August 2009. The provisions of ASU 2009-05 do not have a material impact on our consolidated financial statements.

In January 2010, the FASB issued ASU 2010-02, Consolidation (Topic 810): Accounting and Reporting for Decreases in Ownership of a Subsidiary. This amendment to Topic 810 clarifies, but does not change, the scope of GAAP. It clarifies the decrease in ownership provisions of Subtopic 810-10. For those entities that have already adopted FAS No. 160 the amendments are effective at the beginning of the first interim or annual reporting period ending on or after December 15, 2009. The amendments should be applied retrospectively to the first period that an entity adopted FAS160. The provisions of ASU 2010-02 did not have a material effect on the financial position, results of operations, or cash flows of the Company.

In January 2010, the FASB issued ASU 2010-06, Fair Value Measurements and Disclosures (Topic 820) – Improving Disclosures about Fair Value Measurements. This ASU requires new disclosures and clarifies certain existing disclosure requirements about fair value measurements. ASU 2010-06 requires a reporting entity to disclose significant transfers in and out of Level 1 and Level 2 fair value measurements, to describe the reasons for the transfers and to present separately information about purchases, sales, issuances and settlements for fair value measurements using significant unobservable inputs. ASU 2010-06 is effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances and settlements in the roll forward of activity in Level 3 fair value measurements, which is effective for interim and annual reporting periods beginning after June 15, 2010; early adoption is permitted. We do not expect that the adoption of ASU 2010-06 will have a material impact on our financial position, results of operations or cash flows.

##### **(5) Comprehensive Profit (Loss)**

The Company follows ASC Topic 220 "Comprehensive Income" ("ASC 220"). ASC 220 requires a company to report comprehensive profit/(loss) and its components in a full set of financial statements. Comprehensive profit/(loss) is the change in equity during a period from transactions and other events and circumstances from non-owner sources, such as unrealized gains (losses) on foreign currency translation adjustments. There are no material differences between net profit/(loss) and other comprehensive profit/(loss) for the periods presented.

##### **(6) Going Concern**

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America, which contemplate continuation of the Company as a going concern. The Company is in the exploration stage, has sustained recurring losses which raises substantial doubts as to its ability to continue as a going concern.

In addition, the Company has historically relied on loans and advances from corporations affiliated with the President of the Company. Based on discussions with these affiliate companies, the Company believes this source of funding will continue to be available. Other than the arrangements noted above, the Company has not confirmed any other arrangement for ongoing funding. As a result, the Company may be required to raise funds by additional debt or equity offerings in order to meet its cash flow requirements during the forthcoming year.

The accumulated deficit of the Company from inception through March 31, 2010 amounted to CDN\$10,783,000 of which CDN\$13,965,000 is retained profits from July 2002, the date the Company entered the Exploration Stage, through March 31, 2010.

**(7) Issue of Options under Stock Option Plan**

The Company follows the provisions of ASC Topic 718 Compensation-Stock Compensation ("ASC 718"), which addresses the accounting for share-based payment transactions in which a company receives employee services in exchange for (a) equity instruments of that company or (b) liabilities that are based on the fair value of the company's equity instruments or that may be settled by the issuance of such equity instruments.

The Company has accounted for all options issued based upon their fair market value using either the Black Scholes or Binomial option pricing method. Prior to 2006, the Company used the Black Scholes option pricing method to determine the fair market value of options issued. In 2006, the Company changed from using the Black Scholes option pricing method to the Binomial option pricing model. The Binomial option pricing model breaks down the time to expiration into a number of steps or intervals and can therefore be used to value American style options, taking into account the possibility of early exercise and reflect changing inputs over time. The options issued in 2006 have three vesting periods and therefore, the Company believed the Binomial option pricing model is a more accurate measure of the fair value of the options.

In October 2004, the Board of Directors and Remuneration Committee of the Company adopted a Stock Option Plan and agreed to issue 1,400,000 options to acquire shares of common stock in the Company, at an exercise price of US\$1.00 per option, subject to shareholder approval which was subsequently received on January 27, 2005. All such options were vested by July 2006. The exercise price of US\$1.00 was derived from the issue price of common stock from the placement of shares on September 30, 2004 and is considered by the Company's Directors to be the fair value of the common stock. The options expire on October 15, 2014.

The Company calculated the fair value of the 1,400,000 options using the Black Scholes valuation method using a fair value share price of US\$1.00, strike price of US\$1.00, maturity period of 5 years 7 ½ months, risk free interest rate of 5.15% and volatility of 20%. This equates to a value of US\$31.85 cents per option. The total value of the options equates to CDN\$1,645,780 (US\$1,352,820) and such amount was amortized over the vesting period. At March 31, 2010, the options were fully vested.

Consistent with the provisions of ASC 718, the Company recorded the fair value of stock option grants in stockholders equity. Under ASC 718 an equity instrument is not considered to be issued until the instrument vests. Accordingly, as provided in ASC 718 effective July 1, 2005, the Company has reversed CDN\$551,000 (US\$445,900) being the unamortized restricted stock compensation at June 30, 2005 included in stockholders equity for the unvested portions of stock option grants awarded prior to the effective date of ASC 718.

Since the issue of the options, 600,000 options have lapsed following the termination of participants to the issue.

A summary of the options outstanding and exercisable at March 31, 2010 are as follows:

	<b>Outstanding</b>	<b>Exercisable</b>
Number of options	800,000	800,000
Exercise price	US\$1.00	US\$1.00
Expiration date	October 15, 2014	October 15, 2014

On October 19, 2006, the Directors of the Company agreed to offer a further 4,650,000 options under the Stock Option Plan. The options have no issue price, an exercise price of US\$0.30, and a latest exercise date of October 19, 2016. The options vest 1/3 on October 19, 2007 ("T1"), 1/3 on October 19, 2008 ("T2") and 1/3 on October 19, 2009 ("T3"). The Company obtained an external valuation on the options from an unrelated third party.

The Company, through an unrelated third party consultant, has calculated the fair value of the 4,650,000 options using the binomial option pricing model using a fair value share price of US\$0.30, exercise price of US\$0.30, expected life T1 - 5 years 6 months, T2 - 6 years, T3 - 6 years 6 months, risk-free interest rate of 4.75% and volatility of 90%. The total value of the options equates to CDN\$1,207,860 (US\$1,060,200) and such amount was amortised over the vesting period. For the nine months ended March 31, 2010, the amortization amounted to CDN\$39,421 and no options were forfeited. At March 31, 2010, the options were fully vested.

Since the issue of the options, 600,000 options have lapsed following the termination of participants to the issue.

A summary of the options outstanding and exercisable at March 31, 2010 are as follows:

	<b>Outstanding</b>	<b>Exercisable</b>
Number of options	4,050,000	4,050,000
Exercise price	US\$0.308	US\$0.308
Expiration date	October 19, 2016	October 19, 2016

**(8) Profit(Loss) per share**

Basic profit/(loss) per share is computed based on the weighted average number of common shares outstanding during the period. In prior periods the Company had on issue 10,000,000 special warrants which are exercisable at any time until expiration and for no consideration. On July 1, 2009 the Company re-purchased the warrants and immediately cancelled the options.

Profit/(Loss) per share

The Company calculates profit/(loss) per share in accordance with ASC Topic 260, "Earnings per Share".

The following table reconciles the weighted average shares outstanding used for the computation:

	Nine months ended March 31	
	2010 '000s	2009 '000s
Weighted average shares		
Outstanding - basic	164,733	67,955
- Warrants	-	10,000
Weighted average shares outstanding	<u>164,733</u>	<u>77,955</u>

The following table reconciles the diluted weighted average shares outstanding used for the computation:

	Three months ended March 31	
	2010 '000s	2009 '000s
Diluted weighted average shares		
Basic	177,826	136,714
Effect of employee stock based awards	-	-
Diluted weighted average shares outstanding	<u>177,826</u>	<u>136,714</u>

Options to acquire 4,850,000 shares of common stock were not included in the diluted weighted average shares outstanding as such effects would be anti-dilutive.

**(9) Commitments**

In June 2008, the Company agreed on terms with Tahera Diamond Corporation to obtain full control of the mining properties that are listed in the Tahera/GRR agreement through the issuance of 3,000,000 shares of common stock and the payment of CDN\$86,000. The CDN\$86,000 was paid prior to June 30, 2008. . On May 10, 2010 the final agreements were executed and the shares have been issued.

**(10) Acquisitions**

Golden River Resources as part of its business strategy is increasing its gold and base metal exploration activity in Canada and is continually sourcing new ground in Canada which is one of the most prospective areas for new gold discoveries. On March 17, 2009, the Company announced that it had reached agreement with Acadian Mining Corporation (TSX: ADA) ("Acadian") to subscribe in a private placement transaction for up to 338,111,334 common shares ("Offering") in Acadian for aggregate gross investment of up to CDN\$10 million. The Offering was contemplated to close in two or more tranches giving Golden River a 68.76% holding of Acadian.

The closing of the first tranche, for an aggregate of CDN\$1.0 million (38,111,334 shares) was subject to receipt of the required regulatory approvals, including the approval of the Toronto Stock Exchange which occurred in early June 2009. Upon completion of closing of the initial tranche, the Company was entitled to nominate one member to the board of directors of Acadian and nominated Mr Menachem Vorchheimer. The Company held a 19.9% interest in Acadian at June 30, 2009.

The balance of the subscription by Golden River Resources into Acadian of CDN\$9 million (300,000,000 shares at CDN\$0.03 per share) was expected to be completed in one or more tranches upon the receipt of all necessary regulatory approvals, approval of the shareholders of Acadian and the satisfaction of certain other conditions

precedent, including completion of due diligence by the Company. Acadian obtained approval from its shareholders at its annual meeting in June 2009.

Throughout July 2009, Golden River Resources subscribed for further shares to a value of CDN\$4 million and at July 31, 2009, the Company held a 52.764% interest in Acadian. As a result, Golden River Resources has since that time consolidated the results of Acadian. On September 30, 2009, a further closing for an aggregate of CDN\$1 million occurred increasing the Company interest in Acadian to 57.145% and during October 2009, Golden River Resources completed its subscription in Acadian by subscribing for shares to the value of CDN\$4 million which increased its interest in Acadian to 68.765%.

The transaction was accounted for using the acquisition method required by ASC Topic 805, Business Combinations. The Company has prepared an interim estimate of the fair value of the net assets of Acadian at December 31, 2009. On the acquisition date of July 31, 2009, the fair value of the non-controlling interest was CDN\$41,130,198. The fair value of non-controlling interest was based on an estimate of the fair value of Acadian's net assets. The assignment of the total consideration including the fair value of the net assets of the non-controlling interest as of acquisition date is as follows:

	CDN\$000's
Cash and cash equivalents	1,413
Receivables	44
Property, plant & equipment (net)	10,033
Prepayments	71
Investment in Royal Roads Corp	855
Cash held for remediation	925
Mineral rights	86,798
Accounts payable & accrued expenses	(3,807)
Lease liability	(4,723)
Equipment loans payable	(371)
Advance from Royal Roads Corp	(2,654)
Accrued site remediation	(1,400)
	<hr/>
Total fair value	87,184
Less fair value of non-controlling interest	(41,130)
Less gain recognised on acquisition	(24,626)
	<hr/>
Total consideration	<u>21,428</u>

Fair valuation methods used for identifiable net assets acquired in the acquisition make use of (i) the draft re-start study for the ScoZinc mine which has been adjusted using a net present value discount rate of 10%; and (ii) the valuation of 1,711,000 ounces of gold in the categories of mineralized material using a yardstick valuation of CDN\$30.42 supplied by an external third party. Accordingly, the Company has attributed a fair value of CDN\$86,798,238 to Mineral Rights.

Management believes that the carrying value of receivables of CDN\$44,464 which is the gross contractual amount represents fair value at acquisition date and does not have any evidence that the amount will not be collectable.

Management has also reviewed the property, plant & equipment and other assets and believes the fair values of those assets at acquisition date equate to the realisable values of such assets through disposal or usage.

The acquisition of Acadian was achieved in stages. The acquisition date fair value of the equity interest in Acadian immediately before the acquisition date was CDN\$17,319,353 and the amount of the gain recognized as a result of remeasuring to fair value the equity interest in Acadian before the business combination amounted to CDN\$16,097,557 and has been recognized in the consolidated statement of operations as "Adjustment to fair value on stepped acquisition".

The Company has recorded a gain on bargain purchase of CDN\$24,626,130 which is disclosed separately on the consolidated statement of operations. The gain represents the excess of the fair value of the net assets acquired over (i) fair value of the non controlling interest; (ii) fair value of the equity investment held prior to acquisition; and, (iii) the cash consideration paid. Subsequent to acquiring a majority interest in Acadian, the Company acquired an additional 4.81% interest for CDN\$1 million which resulted in the Company's ownership interest in Acadian being increased from 52.764% to 57.145%. As a result of this additional investment, the Company recorded a credit to Additional Paid-In Capital of CDN\$2,914,126. In October 2009 the Company acquired a further interest of 11.62% for CDN\$4 million which resulted in the Company's ownership interest in Acadian being increased from 57.145% to 68.765%. As a result of this further additional investment the Company recorded a credit to Additional Paid-In Capital

of CDN\$6,289,706. The Company entered into the a fixed price agreement with Acadian in early 2009 to subscribe CDN\$10 million for a 68.765% interest in Acadian, at a time when the world stock markets were at a low point given the world economic crisis at that time. The transaction contemplated several closings and was subject to several pre-conditions including approval by TSX and due diligence. Between the time of entering into the agreement and the acquisition date, world economic conditions have improved, metal prices have increased significantly and world stock markets have rallied. This resulted in significantly higher fair values for the assets of Acadian compared to the values at the time the agreement was entered into. Furthermore, Acadian was in a distressed state at the time the agreement was entered into.

The gain on the identifiable net assets of Acadian caused a difference in the carrying value of the Company's Acadian investment between financial reporting and income taxes and resulted in a deferred tax liability (see note 15).

The amount of revenue of Acadian since the acquisition date included in the consolidated statement of operations for the reporting period is CDN\$nil and the amount of loss from operations is CDN\$4,155,970.

The consolidated statement of operations includes the operations since July 31, 2009, which is the acquisition date. The following unaudited pro-forma information presents the results of operations for the nine months ended March 31, 2010 and 2009, as if the acquisition of Acadian had occurred on July 1, 2008.

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

### FUND COSTS CONVERSION

The consolidated statements of operations and other financial and operating data contained elsewhere here in and the consolidated balance sheets and financial results have been reflected in Canadian dollars unless otherwise stated.

The following table shows the average rate of exchange of the Canadian dollar as compared to the US dollar and Australian dollar during the periods indicated:

9 months ended March 31, 2009	CDN\$1.00 = US\$.8007
9 months ended March 31, 2010	CDN\$1.00 = US\$.9815
9 months ended March 31, 2009	CDN\$1.00 = A\$1.1720
9 months ended March 31, 2010	CDN\$1.00 = A\$1.0678

Prior to July 1, 2009, the Company's functional and reporting currency was the Australian dollar and its subsidiary, Golden Bull Resources Corporation's functional currency was the Canadian dollar. However, as a result of the purchase of the controlling interest in Acadian Mining Corporation in Canada in July 2009, the Company's fiscal 2010 revenue and expenses will be primarily denominated in Canadian dollars (CDN\$). ASC Topic 830 "*Foreign Currency Matters*" states that the functional currency of an entity is the currency of the primary economic environment in which the entity operates. Accordingly the Company determined that from July 1, 2009 the functional and reporting currency of the Company is the Canadian dollar. Assets, liabilities and portions of equity were translated at the rate of exchange at July 1, 2009 and portions of equity were translated at historical exchange rates. Revenue and expenses were translated at actual rates. Translation gains and losses were included as part of accumulated other comprehensive loss.

Restatement of comparative numbers was made for the change in functional and reporting currency. The change was adopted prospectively beginning July 1, 2009 in accordance with ASC Topic 830.

The Company's financial statements are prepared in Canadian dollars (CDN\$). A number of the costs and expenses of the Company are incurred in US and Australian dollars and the conversion of these costs to CDN\$ means that the comparison of the nine months ended March 31, 2010 to the nine months ended March 31, 2009 does not always present a true comparison.

### RESULTS OF OPERATION

#### Three Months Ended March 31, 2010 vs. Three Months Ended March 31, 2009.

As a result of the acquisition of Acadian, commencing at the end of March 2009, there is a lack of comparability between the Company's results for the nine months ended March 31, 2009 and the nine months ended

March 31, 2010. Costs and expenses increased from CDN\$267,000 in the three months ended March 31, 2009 to CDN\$1,705,000 in the three months ended March 31, 2010.

The increase in costs and expenses is a net result of:

- a) an decrease in legal, accounting and professional expense from CDN\$168,000 for the three months ended March 31, 2009 to CDN\$119,000 for the three months ended March 31, 2010, primarily as a result of the non-reoccurrence in the three months ended March 31, 2010 of certain legal and accounting costs associated with the acquisition of Acadian Mining that were incurred in the three months ended March 31, 2009. Included within legal, accounting and professional expense for the three months ended March 31, 2010 is CDN\$68,000 for Acadian which relates to general legal work, audit and stock transfer costs.

Included within exploration expenditure expense for the three months ended March 31, 2010 is work undertaken by Acadian for field exploration activities on its gold properties and certain maintenance work on its Scotia mine which is currently on care and maintenance.
- d) a decrease in stock based compensation from CDN\$28,000 for the three months ended March 31, 2009 to CDN\$Nil for the three months ended March 31, 2010 as a result of options being fully expensed prior to the current period.
- e) an increase in depreciation and amortization expense from CDN\$nil for the three months ended March 31, 2009 to CDN\$160,000 for the three months ended March 31, 2010. - f) an increase in profit on disposal of equipment expense from CDN\$nil for the three months ended March 31, 2009 to CDN\$12,000 for the three months ended March 31, 2010. In order to obtain the benefits of the "safe harbor" provisions of the act for any such forwarding looking statements, the Company wishes to caution investors and prospective investors about significant factors which among others have affected the Company's actual results and are in the future likely to affect the Company's actual results and cause them to differ materially from those expressed in any such forward looking statements. This Form 10-Q report contains forward looking statements relating to future financial results. Actual results may differ as a result of factors over which the Company has no control including, without limitation, the risks of exploration and development stage projects, political risks of development in foreign countries, risks associated with environmental and other regulatory matters, mining risks and competition and the volatility of gold and copper prices, movements in the foreign exchange rate and the availability of additional financing for the Company. Additional information which could affect the Company's financial results is included in the Company's Form 10-K on file with the Securities and Exchange Commission.

#### **Item 3. Quantitative and Qualitative Disclosures About Market Risk.**

At March 31, 2010, the Company had no outstanding loan facilities.

#### **Item 4. Controls and Procedures.**

##### **a) Evaluation of Disclosure Controls and Procedures**

Our principal executive officer and our principal financial officer evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934 as amended) as of the end of the period covered by this report. Based on that evaluation, such principal executive officer and principal financial officer concluded that, the Company's disclosure control and procedures were effective as of the end of the period covered by this report at the reasonable level of assurance.

##### **b) Change in Internal Control over Financial Reporting**

No change in our internal control over financial reporting occurred during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect our internal control over financial reporting.

##### **c) Other**

We believe that a controls system, no matter how well designed and operated, can not provide absolute assurance that the objectives of the controls system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected. Therefore, a control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Our disclosure controls and procedures are designed to provide such reasonable assurance of achieving our desired control objectives, and our principal executive officer and principal financial officer have concluded, as of March 31, 2010, that our disclosure controls and procedures were effective in achieving that level of reasonable assurance.
